

GURBAN JUMAGULYYEV

3RD Yr. Student at York University – Lassonde School of Engineering

Toronto, ON, Canada / M : +1 (437) 226 3671 / Email: gurban2000@gmail.com / Portfolio: <https://gurbanportfolio.wordpress.com/> / GitHub: <https://github.com/gurbanj>

Education

Honors Bachelor of Engineering Spec. in Computer Engineering
Lassonde School of Engineering, York University

Toronto, Canada
2018 – Present

High School - International Baccalaureate Diploma (IBDP)
International School Manila

Manila, Philippines
2014 – 2018

Work Experience

STORMCON (Stormwater Management Solutions)
(Internship - Web Developer)

Toronto, ON, Canada
Dec 2019 – Apr 2020

- + Assisted in creating and managing a dynamic responsive website with the use of JavaScript, HTML, PHP and jQuery for a start-up company focusing on Stormwater Management Solutions. The website is up and running efficiently.
- + Assisted in testing bugs in the program and ensured that the website ran smoothly in accordance with the design approved by the development team.
- + Ensured that the images are integrated to the correct size and is matched to the correct products and technical requirements of the STORMCON products on the market. Continued services remotely upon request, during lockdown.

INTERNATIONAL ORGANIZATION FOR MIGRATION (IOM)
(Internship – SAP & Mobile Development Team)

Manila, Philippines
July – August 2019

- + Assisted in developing Systems, Application, and Products in Data Processing (SAP) using Advanced Business Application Programming (ABAP) which utilizes base computing languages such as Python, Java, C and C++ to produce programs such as a fully operating shopping system.
- + Designed and built a cross-platform, responsive and enterprise-ready shopping system using OpenUI5 which utilizes JavaScript, LESS and jQuery to create a complete application.
- + Assisted in debugging current applications in SAP, ABAP and OpenUI5 that were developing at the time by the Mobile Development Team.
- + Participated the middle and end of the month SAP and Mobile Development team meeting to discuss the progress to date and goals that were achieved and observed how the team sets goals for the upcoming months. Additionally, provided updates on the assignments that were assigned to me.

FREELANCE
(IT Technician)

Manila, Philippines
May – July 2019

- + Worked with private clients to identify computer security needs and educated clients on the proper ways to ensure the security and efficiency of their computer equipment.
- + Upgraded PC hardware and software, in addition provided technical support and troubleshooting on PC and laptops for private clients.
- + Installed and configured systems and application on a Macintosh and Windows PC.

ASIAN DEVELOPMENT BANK (ADB)
(Internship – Youth for Asia Sector)

Manila, Philippines
June – July 2017

- + Developed a project plan aimed to address Sustainable Development Goal 12: Responsible Consumption and Production. The project was called Pinoys Generating Relevance for Environmentally Enhancing Niches (P.G.R.E.E.N) and consisted of a team of interns with the supervision of a youth project designer and an energy specialist, by using the resources provided to us from the Youth for Asia Sector.
- + Carried out fundraising responsibilities by approaching local Filipino businesses and authorities to secure funding and get them on board with our planned project and promotional event to help these businesses transition to more sustainable ways of manufacturing their products.
- + Participated in a week of intensive workshops with an independent development and humanitarian organization called Plan International to give my input as the youth and understand the types of projects a humanitarian organization deals with when advancing in children's rights and equality for women.
